new technology

„VET Fusing 4.0“ wins Texprocess Innovation Award 2015!

VET wants to make their customers' fusing operations as easy as possible by offering intelligent process solutions. "VET Fusing 4.0" provides a decentralised control of the fusing process in a network where the machine can communicate with itself, other machines and the goods. VET's FX Diamond Fusing Machine with the "VET Fusing 4.0" technology is ready to meet all the requirements of intelligent manufacturing process from many of these advantages right now – even without being completely interconnected.

velt FUSING KANNEGLIESSER INSIDE

VET - The future of fusing technology.

15 years ago, we acquired the fusing technology division from KanneGleisser. And we have been continuously enhancing the machines ever since – to reach a perfect synthesis of KanneGleisser and VET, of technology and innovative strength. As of 2016, our fusing machines will bear only one name: VET.
